Foundry Networks Inc. has contributed a generous gift to establish the Joyce Iannuzzi Endowed Scholarship for Computer Science and Technology.

The scholarship honors Mrs. Iannuzzi, who began her career in 1965 as a mathematics data aide at Arnold Engineering Development Center. By 1970 she had earned the distinction of becoming the company’s first female engineer. In 1975 Joyce came to UAB and for the next almost 30 years served as customer support, advocate, and champion for thousands of students, faculty, and staff. She was manager of user services until her untimely death in May 2003.
